

“Artist Architect” Sitki Promotes Art for the Visually Impaired

PRODUCTS/SERVICES: Fine art (Impressionism, Modern Art, Creating for the Blind), textile design, private art lessons and portfolio reviews.

BACKGROUND: Born in Turkey, Sitki studied art in Oxford, England. He specialized in textile design at the Croydon School of Art in London. He received a Master of Art in Printed Textiles, Fashion Illustration and Museum Research from the St. Martins School of Art in London.

GREATEST STRENGTHS: Oil painting, creating art for the visually impaired and creating textile designs for commercial products.

CUSTOMER SERVICE STORY: The paintings Sitki creates for the visually impaired are raised outlines--so individuals can touch and make out the shapes. At the same time, flat areas are painted on the surface of the canvas. “To create the outlines, I squeeze the paint to build up the thickness, and allow it to dry. My art is created from deep in my heart. I want to reveal my vision and passion to the visually impaired by touching and feeling my paintings. At the same time, I want to promote art in a social aspect and add a new dimension to their lives.

SPECIAL PLANS: Sitki is presently organizing a partnership with Art Education for the Blind in New York City and speaking on April 25 in Mount Kisco at the Holiday Inn on behalf of the American Society of Ophthalmic

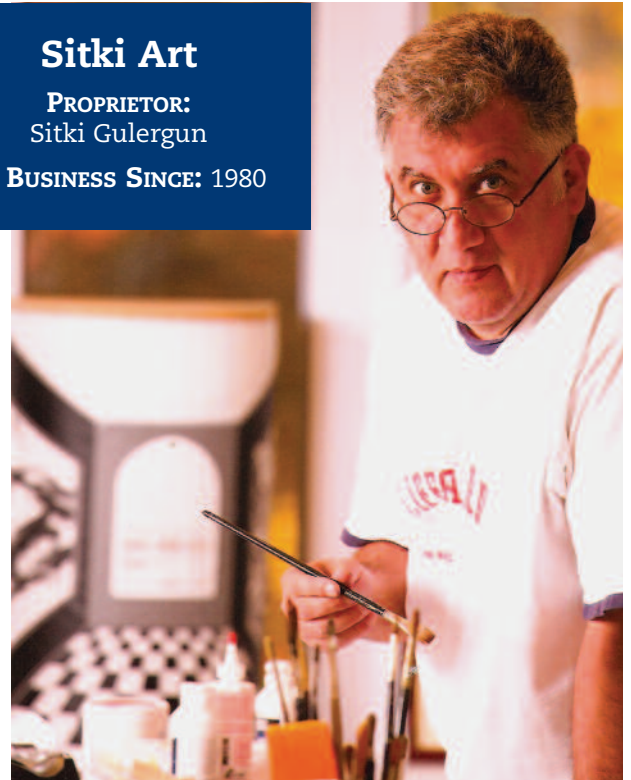

Registered Nurses (ASORN). He will also be exhibiting "Art is Not Blind"...paintings by Sitki.
